

MULTI-ROOM AUDIO SOLUTIONS

Your Whole Home Sounds Beautiful

Triad builds a comprehensive range of high-quality, built-to-order premium audio speakers for every space in and around the home. These speakers are engineered to exact specifications and meticulously assembled to deliver uncompromising sound from the kitchen to the garage and even the bathroom, with incredible flexibility to install speakers in-ceiling, in-wall, on-wall, in-room, and outdoor. With Triad's custom paint match service, dealers receive the speakers pre-painted the perfect color, eliminating the extra time, cost, and frustration of painting grills or cabinets. Over twenty real-wood veneers and invisible options are also available, allowing the speakers to blend with any decor or completely disappear. The expansive product line helps you deliver fantastic sound anywhere in and around every home.

The Triad Experience

- + Flexible installation and configuration options make it easy to add exceptional sound to any space in every project, including new construction, retrofit, outdoor, and invisible
- + Meticulously engineered using the finest materials and components to deliver an exceptional sound experience throughout a home
- + Hear, but not see, your audio with flexible options, including invisible speakers and any-color paint matching for speaker grills
- + Unique and flexible customization options include custom cabinet sizes, any-color paint matching, and over 20 real wood veneers to complement any decor
- + Expansive product line delivers fantastic sound for every budget

The Triad Multi-Room Audio Family

Triad speakers and subwoofers are available in a variety of installation configurations, providing you with incredible installation flexibility. Configurations include on-wall, in-ceiling, in-wall, in-room, invisible, and outdoor versions. We've designed our speakers to deliver the same sound profile for a given line, irrespective of the form factor (e.g. a Gold in-wall LCR delivers the same sound and performance as a Gold in-room LCR), so there is no penalty for using in-wall or in-ceiling speakers just because that's what the room requires.

Rounds

Very popular in-ceiling speakers available in four grades: R-series, Mini, Bronze, and Silver.

Micro

Our smallest on-wall speaker designed to give big sound in small spaces.

Mini

Designed with 4" drivers to be small, discreet, and affordable.

Bronze

Designed with 5.25" drivers for bigger sound and higher sound quality.

Silver

Designed with 6" drivers for excellent performance and value.

Gold

Large 8" drivers and three-way design deliver full, rich audio.

Platinum

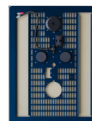

Dual 10" drivers deliver more sound to fill a larger space with exceptional detail.

Cinema Reference

Exceptional sound quality and efficiency for the audiophile or music professional.

Invisible

For when the music needs to be heard, not seen.

Outdoor

The name is a clear giveaway.

Getting Started with Triad Multi-Room Audio

To successfully deliver audio anywhere in a home, you need options. Triad builds a comprehensive range of options in a variety of sizes, mounting options, and price points, enabling dealers to deliver fantastic sound anywhere in the home.

Dealers can guide their customers to select the perfect Triad soundbar by helping them answer two questions:

What is the desired sound quality and audio volume for the room/space?

- + Guides dealers on how many speakers to use and which grade: Micro, Mini, Bronze, Gold, Platinum, and Cinema Reference
- + Speaker sound quality and volume increase as you go up the product line from Micro to Cinema Reference
- + Need to know where to place your in-ceiling speakers to properly fill your space? Use the In-Ceiling Speaker Distance Calculator
- + Still need help? Contact the Triad Design Services team at **1-800-666-6316**

What are the installation requirements or limitations?

- + Guides dealers to the proper form factor for each room
- + Form factors include In-Ceiling, In-Wall, On-Wall, In-Room, Invisible, and Outdoor versions

Hearing Is Believing

The best way to get your customers excited about Triad speakers and help them appreciate the exceptional sound they offer is through your showroom. Use the Triad demo program to outfit your showroom and create an amazing multi-room audio experience, so that potential customers can understand why you are the right partner and why they only want Triad speakers in their home.

Use Triad Whenever a Customer Wants to Fill Their Home with Music

Homeowners who are enthusiastic about music desire an exceptional audio experience throughout their home.

Competitive Differences

Customers considering other premium home theater offerings really need to experience Triad. Key differences include:

- + Built with the finest materials and components to deliver a superior sound experience throughout a home
- + Unique options to deliver a custom experience to simplify installation, save time, and reduce cost and frustration
- + Built to order, which offers flexible customization including custom cabinet sizes, any color paint, and over 20 real-wood veneers to complement any decor
- + Broad, flexible product line of speakers voiced for consistent sound across in-ceiling, in-wall, on-wall, or in-room
- + Sealed enclosures ensure the very best audio experience and sound isolation

THE TRIAD COMMITMENT

For over 30 years, Triad has been a leader in high-end, custom loudspeakers—handcrafted and made to order for a superior audio experience. Our focus has been delivering exceptional products, installed by professionals to create immersive experiences for music and entertainment enthusiasts. As a leader in custom loudspeakers, Triad was the first to introduce in-wall and in-ceiling speaker designs with completely sealed acoustic enclosures, delivering the performance of a standalone in-room speaker in an in-wall configuration. At Triad, every speaker is engineered using the finest materials and components to deliver an exceptional audio experience. For customers who demand truly the best in audio performance, Triad delivers.
